

Music Arranging, Transcribing, and Notation Services

Are you a songwriter with a basic song idea but need to add the finishing touches? I can take your song from a raw idea captured in any format and transform it into a completed arrangement, ready for performance. I can supply you with printed charts so you can communicate quickly and clearly to any group of musicians. I can write charts in traditional notation, as well as lead sheets, rhythm charts, and the Nashville Number System.

Do you need string or horn arrangements to add that last bit of sparkle to your tunes? I can compose parts that will complement your song and take it to the next level.

Do you want to perform a cover version of a recorded song but just can't quite figure it out by ear? Let me do the work for you and give you any kind of chart you need to help you learn the song.
