Crash Course in Music Theory

In order to succeed in the music business, it is critical that you are able to communicate your musical ideas clearly and quickly. A basic understanding of the language of music is an indispensable tool.

While classical theory is important to understand, there are other aspects of music theory that are critical to understand for pop, rock, country, jazz, and other commercial styles. In order to be as effective as possible no matter the style of music, there are basic concepts from all branches of music theory that should be incorporated into your understanding.

I am offering a 90-minute crash course in music theory that will introduce you to these basic concepts. The course is available privately or as a seminar at a discounted rate. You will leave this seminar with the knowledge you need to communicate effectively as a professional musician.

Course Includes:

- The Basics - Melody, Harmony, Rhythm, Consonance and Dissonance
- Classical Theory - Notation, Meter, Dynamics, Form and Structure, Terms
- Popular Styles - Lead Sheets, Chord Charts, Feels and Grooves, Improvisation, Lingo
- **Nashville Number System**
- Chords - Intervals, Triads, Extensions, Alterations
- Scales - Major, Minor, Modes
- Learn which scales to use on which chords and HOW TO SOLO!
- Your questions answered

Date and Time TBA
