

Custom Music Production

The music business has changed. More is expected of upcoming artists, songwriters, and musicians. In order to take the first step towards a career in music you must have a professional demo that shows your best work and what you are capable of.

This demo does not have to cost an arm and a leg or take years to complete. A simple piano/vocal or guitar/vocal demo can make all the difference. For some, this kind of musical arrangement will be just what their song needs. Others may wish to kick it up a notch and have a fully produced demo with live or programmed drums, guitars, bass, background vocals, etc...

In either case, I can produce a custom demo for you and can equip you with the product you need to take your career to the next level. I will guide you through the entire process from song selection and arrangements to mastering and duplication.
